- 4+ years of experience facilitating cutting-edge engineering solutions with a wide range of applications and technology skills.
- Extensive expertise in writing reusable, testable, and efficient code.
- Proven ability to leverage full-stack knowledge and experience to build interactive and user-centered websites and backend APIs that scale.
- Strong analytical skills, problem-solving aptitude, and attention to details.

Work Experience

SOFTWARE ENGINEER

DPL – Islamabad

March 2023 — Present

- Developed the [DQAC](#) (Digital Quran Authentication & Certification) project's frontend application from inception to production release using React and contributed to backend APIs using Nest.js.
- Led backend development for [0-100](#) Project, a Sweden-based trivia game, using Node.js (TypeScript) on AWS Serverless architecture (Lambda, API Gateway, S3, EC2, CloudWatch, CloudFront, DynamoDB).
- Built responsive landing pages, a web version of the game (HTML, CSS, JS), and an Angular-based admin panel for project management.
- Ensured iterative releases in an agile environment, maintained client communication, and optimized scalability and performance.

SR. MEAN STACK DEVELOPER

Vizz Web Solutions Pvt Ltd. – Islamabad

February 2022 — March 2023

- Managed company's flagship software product [Digiebot](#), an innovative platform, that automates cryptocurrency trades across various exchanges, including *Binance*, *Kraken* and *OKX*. Digiebot is Super Smart, Ultra-fast, Low Cost, Constantly Improving Software.
- Ensured Digiebot is up to date and running smoothly, providing users with invaluable loss control and risk management to maximize their profits.
- Added features like Money Management, Cost Averaging, Long Term Hold, Sentiment Analysis, Fundamental Analysis and Technical Analysis.
- My day-to-day responsibilities included managing Digiebot's frontend Trading app on Angular, integrating new features into it, creating and upgrading RESTful APIs on NodeJS and writing complex queries for data communication with MongoDB.

MEAN STACK DEVELOPER

The Right Software Pvt Ltd. – Rawalpindi

November 2020 — January 2022

- Contributed to several large-scale projects e.g., *YayOrder*, [Almadfoon](#), [Sharrai.ae](#), [MallsDirect](#) etc. Designed and implemented their backend in NodeJS; writing APIs for frontend mobile and web apps (i.e., Android, iOS & Angular), using MongoDB as Database.
- Developed frontend apps in Angular using Html, CSS/SCSS, Bootstrap, Angular-Material, JavaScript, TypeScript, jQuery etc.
- Integrated various third-party APIs like Google APIs, Firebase, Noon Payments, Stripe Connect, Ship Station and Socket.io.
- Developed programs that efficiently scraped data from hundreds of websites and e-commerce stores within minutes using

packages like Cheerio and Puppeteer

Internee Web Developer

TheAWeb Pvt. Ltd. – Islamabad

August 2020 — November 2020

- Contributed to backend development of startup applications utilizing AR technology like *Coupon Azul* & *PromoQuest.com*.
- I designed and developed several frontend pages and other UI components for Angular and Ionic applications using Html, CSS, Bootstrap, Materialize and tools like Figma.
- Developed and maintained custom made Inventory and Freight Management Systems for our client's businesses.
- Improved system performance by making proactive adjustments and resolving bugs.

Education

BS in COMPUTER SCIENCE

COMSATS University Islamabad, Pakistan

2017 — 2021

Tools & Technologies

- Node.js	- Express & NestJS	- REST APIs	- MongoDB
- Angular	- HTML/CSS/SCSS	- Bootstrap, Material	- DynamoDB
- JavaScript, TypeScript	- AWS Serverless	- API Gateways	- Lambda
- S3	- EC2	- CloudFront	- IAM
- Git/CodeCommit	- Stripe Connect	- Ship Station	- Firebase, Google APIs
- NPM	- Socket.io	- Hosting & Deployments	- Web Scrapping & Automation
- Agile	- SCRUM	- Jira, Trello, Asana, TSF	- Postman, Swagger
